Mark and Steve, please review the ESAT Tox and Bio document and provide your input into the comment log. Tammy would like this information by COB 7/17/15. I know you're extremely busy with the Animas spill but do your best to get the required information reviewed and updated in the comment log.

Thanks, Don

NEIC and R8,

Iron Horse is working through the lab document updates, space by space, in response to the lab sessions last week. Below and attached are the first three labs for the scientists and leadership to review. Please note the bullet points requesting specific review/information for each lab.

Cynthia,

Attached are (3) .pdfs and (2) Excel files of the labs we reviewed with the users while on campus last week. Will you please forward these to the following users for further input?

Lab 1A-245 – ESAT TOXICOLOGY & GENERAL BIOLOGY: Dan Wall via Mark Burkhardt

- Confirm all equipment on equipment schedule (add equipment to schedule that is not presently shown, but will in fact be located in the lab)
- Determine quantities of equipment that are not presently listed on the equipment schedule (we will need to reconfigure the lab layout to accommodate these with all required clearances)

Lab 1C-045 – SHARED ORGANIC INSTRUMENTS: Dan Hurlbut via Diane Sipe

- Confirm all equipment on equipment schedule (provide groupings)
- Match equipment groupings on equipment schedule with their location on the plan

Lab 1C-115 – SHARED VOC: Dan Hurlbut via Diane Sipe

- Confirm all equipment on equipment schedule (provide groupings)
- Match equipment groupings on equipment schedule with their location on the plan

Thank you,

Becca Hoynoski, Associate AIA
